CRP INDUSTRIES ADDS SOLAR POWER TO CRANBURY, NJ HQ FACILITY

– System will produce 75% of the company’s annual electrical needs –

Cranbury, N.J., September 2012 - CRP Industries Inc., a leader in the automotive parts and industrial products sectors, has turned to solar energy to power its headquarters facility as part of a continuing program to go “Green” and maximize its overall conservation efforts. A state-of-the art 500-kilowatt, solar panel system, which will significantly help to reduce the company’s energy dependence and costs, has been installed on the company’s 108,000 sq. ft. state-of-the-art office warehouse facilities in Cranbury, NJ.

According to CRP President/CEO, Dan Schildge, noted, “We are very excited at the advantages this new solar power system will afford us, and the positive contribution we will be making to the environment. Our new system should produce enough electricity to cover 75% of our current annual energy needs.”

Schildge also noted that in addition to the Cranbury location, CRP also has a solar panel system in its Fremont, CA facility. The system in place at Fremont supplies 90% of the facilities annual energy needs.

CRP Industries’ initiative is part of the New Jersey’s
